PROFESSIONAL SUMMARY

Computer Science student passionate about building products and solving real-world problems through technology. Experienced in developing full-stack applications, collaborating in teams, and turning ideas into working solutions. Interested in product development, user experience, and learning how great products are built and scaled.

EDUCATION

Bachelor of Technology (B.Tech CSE - AI/ML)
Polaris School of Technology, Bangalore

2025 - 2029
CGPA: 7.6 (Sem 1)

Intermediate (Class XII)
Sandipani Vidyalaya

2025
Grade: 66.46%

Matriculation (Class X)
Maa Jasjeet Jee Vidyalaya

2023
Grade: 84.16%

PROJECTS

Synvex – Next-Gen AI Interview Prep System

[GitHub Link](#)

Tech Stack: React.js, Node.js, Express.js, PostgreSQL, WebSockets, Gemini API, Deepgram API

- Collaborated on developing a real-time interview preparation platform supporting live voice and text interactions.
- Managed structured data storage and organization using PostgreSQL for interview sessions and performance tracking.
- Contributed to improving the interview experience by identifying workflow issues and collaborating on feature enhancements for smoother user interactions.
- Worked on testing, debugging, and improving application performance in a fast-paced development environment

TokenGuard – Secure Authentication System

[GitHub Link](#)

Tech Stack: FastAPI, Python, JWT, bcrypt, SQLite

- Developed a secure authentication system focused on improving account security and user access management. Maintained organized API structures and ensured accurate handling of user information and requests.
- Performed testing and debugging using Postman to ensure system reliability and consistency.
- Worked with documentation and modular backend structures for maintainable system operations.

FinStack – AI-Powered Personal Finance Ledger

[GitHub Link](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, Firebase, Gemini API

- Built a finance tracking platform to help users manage expenses and track financial activity more effectively.
- Managed user authentication systems and maintained secure handling of user data.
- Worked with dashboards and reports to present financial information clearly and efficiently.
- Collaborated on improving usability, organization, and overall application workflow

SKILLS

Languages: JavaScript, Python

Frontend: React.js, HTML5, CSS3

Backend: FastAPI, Node.js, Express.js, *Learning Django*

Database: MongoDB, PostgreSQL

Tools: Git, GitHub, Postman, Firebase

Concepts: Data Structures & Algorithms (*Python*), REST APIs, Authentication (JWT), WebSockets, Real-time Systems, Backend Development, Database Design

EXTRA-CURRICULAR ACTIVITIES

- Collaborated in hackathons and team-based projects under strict deadlines, improving coordination and communication skills.
- Regularly practice problem-solving and logical reasoning through coding platforms like LeetCode and CodeChef.
- Experienced in handling project documentation, testing workflows, and maintaining organized development processes.
- Continuously exploring new technologies and improving professional communication and technical skills.
